Annotation

Toponim made in the event of careful meditation requires interaction. When toponimlikkacha because in many cases, this process will be the night. Despite this in science, including science at uzbekistan, toponim made of scientific work is dedicated to the phenomenon, this research it was noted that in toponim made from affiksasiya effective method. Made of tajikistan in this article is to identify and active in northern toponim affiks with the help of an example is shown.

Keywords. Affiksasiya form corner Tirmizaktepa, Puchuqoylar, Oqtangilar additional prefix, its geographical name.

Toponim is one of the most effective and widely used methods of using them to generate affiks. They, among other things, "... affiksasiya-this is an effective tool for the development of a geographical name and the name of the place in this part supplements the form (form) decisive and important role, that is made more effective in the formation of geographical names toponim supplements in comparison with which prefix,..."¹. This Toponimik additives hto afford pronounced in northern tajikistan al toponimik the role of material is removed. Well-known about the slavs toponim v. a. nikonovning toponim the above idea of an institution of geographical terminology of the territory of tajikistan is fully compatible. Northern Tajikistan toponimik analyze materials, using the form of a geographical name go back to the period of the formation of the majority of known and very ancient hajman bo'ldi.

English in science and especially in the formation of toponim supplement is more common and widespread. Toponim in the formation of the "s"to supplement the study of the mass of elements which are repeated toponim and researchers, as well as toponim, supplements and toponimik allows you to identify the prefix"².Indeed, the majority of English grammar qonuniyat

formantlarining toponimik formed on the basis of form. In the classification and analysis of geographical names toponymic therefore we must pay attention to the following conditions:

- pronunciation lahfonetik at coming on to identify mold;
- The forms of production and the distribution of the scope of the loss to determine;
- Forms historical development and the spread to determine;
- linguistically related to the detection of the language of toponymic because all may not be related to their distribution within the toponymic;
- identify the difference between toponymic.

According to this classification, the following types of toponym which made toponymic you can divide Northern Tajikistan.

- s formants; if you have a sense made form this form in English, plural form. It should be noted that, in the history of turkic languages toponymic this feature is present since the ancient period applies from insight as to represent the plural in English and the most important morphological category. From the historical aspect "-s" the name of the place in the structure occurs mainly available supplement. This supplement is a supplement form in the name of the place now. Therefore, this supplement its specific characteristics and we mainly formed in those places them in the name of a certain area of the part of the majority of place features and to pay attention. Toponym more horses such supplements in the system and its surrounding northern Tajikistan, the quality, number, and others toponymic and fulfilled the function of the formation of toponymic. Example attention to qthis aratsak hya buyQQbuy is realized.

a) horses: türkiye (mahalla name); nayman of (neighborhood name); qipchoqlar (village name)

b) quality and otdan: Puchugoylar (mahalla name) Oqtanggilar (pasture), Ko'ktoshlar (the name of the hill), towards(q)qir (crop area name)

v) the number and otdan: Beshjuzlar (rural), Uchtomlar (rural pasture) of Mingbirebuloqlar (steppe name)

– iston formants yielding the formation of toponymic is, the more the state and the city in the name of the structure occurs. Uzbekistan, Tajikistan, Gulistan.

– Formants toponymic efficient than stock company and creates the following types of: alfalfa, we have (its name), kunjak (village name, the name of the crop area), do'ngalak (ovul name, guzar name) Tirmizaktepa (the name of the hill),

future girl (place name) popushak (neighborhood name), angle (neighborhood name) and others.

- cha formantli the English form is nowat the small of toponim represent the name of a place is often compared to another along with the small area, the name of the object means that it is small. Ko'lchilik (hydro I), kindergarten (fitonim), the mountains (oro I), are offering deg (toponim), Guards (crop area) of the grave far (pasture, crop area), production far (village name, ovul name), landing (village name), Diploma (the hill, the name of the crop area), burn far (steppe name), qipchoq far (village name). This form in the dialect of the local population is used a lot.

- wow formantli qo'shimcha actually Persian-Tajik language from o'zlashma have, is applied in toponim made active. Additional naming this plant is considered especially effective by the world. (With fitonim); Olchazor (fitonim), terakzor (oro I) Almazar, and others.

– wow this supplement is the supplement ekvivalianti formanti sor. Also this qo'shimcha in the sense that plural is also used. Chashmasor (oro I), Ispisor (toponim).

As noted above, the development of toponim affiks form is a common phenomenon, toponimik supplements plays an important role. Northern Tajikistan toponimik system at the same time created using some of toponim at the prefix occurs, but this method is very kammahsul it even more forscha-tojikcha toponim we have a witness that was made from. "Theo'roq (the destroyed settlements.), BeG'er (toG' name), Beov like this sometimes also toponim Beova have been applied.
